Sit is hard/structures, interfoo. One structure is

tall, large, solid, <sup>with a</sup> sense of massiveness, imparting the feeling  
 of being overwhelming. Noticeable (unpleasant) <sup>Chemical</sup> smells & taste;  
 atmosphere seems dim, ~~dark~~ dark, hazy. Another ~~one~~ involves  
 a pronounced sense of roundness or curving around & also  
 has noticeable industrial-like smells.

One structure is a building of numerous levels, at  
 least one of which is filled w/ cubicles divided by  
 a central corridor. Cubicles are small restricted, access  
 is controlled, & involve segregation, a sense of observing & of  
 being organized, & of development. People seem to be in  
 the cubicles, & may have originally been there for other  
 purposes but are being used because they're convenient there.
